EDUCATION

State University of New York at Fredonia

Bachelor of Science in Computer Science

Fredonia, NY

Aug. 2022 – May 2025

EXPERIENCE

Client Support Engineer

Accessium Group

July 2025 – Present

Williamsville, NY

- Deliver Tier 1/2 support for a **large-scale healthcare/radiology environment (8,000+ users)**, supporting clinical and business systems across **170+ locations**
- Resolve **20–30 daily support requests**, including desktop, networking, and application issues in a high-volume healthcare environment
- Troubleshoot **VPN (Palo Alto) and VDI (VMWare Horizon)** access issues impacting remote clinical staff and radiologists
- Diagnose and resolve Windows system issues including profile corruption, update failures, and driver conflicts
- Support **enterprise hardware and medical imaging systems**, minimizing downtime in critical healthcare workflows
- Document troubleshooting steps and contribute to internal knowledge base articles to improve team efficiency

Quality Engineering Intern

3AM Innovations

Sep. 2024 – Dec. 2024

Buffalo, NY

- Developed Python automation scripts to streamline QA workflows, reducing manual effort in system validation and data processing
- Assisted in designing and executing test plans and validation processes for software systems
- Utilized Git version control, Agile methodology, and collaborative issue tracking through Azure Boards to troubleshoot software and system defects in coordination with software engineers and QA team

CERTIFICATIONS

CompTIA A+

June 2025

Microsoft Certified: Azure Fundamentals (AZ-900)

Oct. 2025

Cisco Certified Network Associate (CCNA) (In Progress)

Expected Summer 2026

TECHNICAL SKILLS

- **Systems:** Windows 10/11, Active Directory, Entra ID, Exchange
- **Networking:** TCP/IP, DNS, DHCP, VPN (Palo Alto), connectivity troubleshooting, network monitoring (Auvik)
- **Tools:** ServiceDesk Plus, Auvik, Datto RMM, NinjaRMM
- **Scripting:** Python (automation, APIs)
- **Cloud:** Microsoft Azure (AZ-900)

PROJECTS

Conductor | *Associated with 3AM Innovations*

Sep. 2024 – Dec. 2024

- Developed a Python-based automation tool to **eliminate repetitive QA workflows** through API integration, CSV processing, and configurable input handling
- Implemented input persistence to retain and reuse user-provided data across sessions
- Designed JSON-based configuration system for flexible environment variable management
- Built robust error handling and logging to improve reliability and debugging efficiency

PC Builds and Hardware Diagnostics | *Personal*

Ongoing

- Built and upgraded multiple desktop PCs, selecting compatible components based on needs and budget
- Installed and configured operating systems (Windows, Linux), drivers, BIOS/UEFI settings, and performance tools
- Resolved complex hardware issues including boot failures, overheating, and GPU/power supply diagnostics
